Lenovo
OEM Solutions

Every day we are setting the stage for what's possible with technology. Lenovo OEM Solutions offer the intensive performance and reliability that's essential in today's critical healthcare applications. No matter the area you are focused on — patient information systems, life sciences, radiology, virtual care, or veterinary systems — you will gain access to predictable service, secure leading-edge technologies, and extensive solution development support.

Safer medication dispensing

Cerner RxStation carts automatically link medication dispensing to patient records, helping to improve patient safety, hospital staff efficiency, and pharmaceutical controls. Custom software designed by Cerner runs on the fully integrated Lenovo ThinkCentre® 720q.

Molecular diagnostics technology

Lenovo ThinkCentre M70s and ThinkPad® T490 devices power a wide range of Cepheid's diagnostic tests for the healthcare industry. Lenovo partner Contec adds end-to-end value for Cepheid with packaging, supply chain, and virtual warehouse services.

Infectious disease testing

BioFire Diagnostics uses Lenovo ThinkPad E14s with custom BIOS in its infectious disease testing solutions, along with Lenovo's Kanban services, Lenovo Premier Support, and durability testing from Lenovo partner Valcom.

Powering what's next with our innovative technology

ThinkCentre M90n Nano

The Nano's powerful performance with built-in security uses less energy and a smaller footprint.

ThinkCentre M80q

Designed for robust, intensive tasks, the M80q is a compact PC that makes an impact. A ThinkSmart edition is also available for video conferencing.

ThinkStation P340 Tiny

Performance, speed, security, six screen display ports, and a smaller footprint make the P340 Tiny a powerful and versatile machine.

ThinkEdge SE30

Improving efficiencies at the edge, the ThinkEdge SE30 delivers security, reliability, performance, manageability, and connectivity, while acting as a bridge between devices and the cloud, enabling data-to-action at real-time speeds.

InStore Screen

LED display technology that can improve everything from inventory management systems to real-time pricing decisions, leveraging ISVs with the right content management systems to manage the data and analytics platforms.

ThinkEdge SE50

Delivering powerful edge computing and data inference, the ThinkEdge SE50 does double duty as a powerful edge computer and an IoT gateway to support all local IoT processing, storage, and communications requirements.
